1. 다음 글의 주제로 가장 적절한 것은? ¹⁾ [12강 15번]

Simply giving employees a sense of agency – a feeling that they are in control, that they have genuine decision-making authority – can radically increase how much energy and focus they bring to their jobs. One 2010 study at a manufacturing plant in Ohio, for instance, carefully examined assembly-line workers who were empowered to make small decisions about their schedules and work environment. They designed their own uniforms and had authority over shifts while all the manufacturing processes and pay scales stayed the same. Within two months, productivity at the plant increased by 20 percent, with workers taking shorter breaks and making fewer mistakes. Giving employees a sense of control improved how much self-discipline they brought to their jobs.

- ① the need to improve the working environment of workers
- ② the reason why employees should have a sense of ownership of the company
- ③ differences between the working environment of the manufacturing plants and other ones
- ④ the importance of the authority of the director to improve the productivity of the factory
- ⑤ the positive impact of giving employees a platform for control and decision-making

2. 다음 글의 요지로 가장 적절한 것은? ²⁾ [12강 16번]

Many of us live our lives without examining why we habitually do what we do and think what we think. Why do we spend so much of each day working? Why do we save up our money? If pressed to answer such questions, we may respond by saying "because that's what people like us do." But there is nothing natural, necessary, or inevitable about any of these things; instead, we behave like this because the culture we belong to compels us to. The culture that we inhabit shapes how we think, feel, and act in the most pervasive ways. It is not in spite of our culture that we are who we are, but precisely because of it.

- ① 습관적으로 사는 것은 지양해야 한다.
- ② 문화가 우리의 삶과 사고의 방식을 형성한다.
- ③ 문화의 다양성을 인정해야 할 필요가 있다.
- ④ 현재 살고 있는 문화권의 소중함을 느껴야 한다.
- ⑤ 분명한 목적을 가지고 행동해야 한다.

3. 다음 글의 제목으로 가장 적절한 것은? ³⁾ [12
강 17번]

The fast-paced evolution of Information and Communication Technologies (ICTs) has radically transformed the dynamics and business models of the tourism and hospitality industry. This leads to new levels/forms of competitiveness among service providers and transforms the customer experience through new services. Creating unique experiences and providing convenient services to customers leads to satisfaction and, eventually, customer loyalty to the service provider or brand (i.e., hotels). In particular, the most recent technological boost received by the tourism sector is represented by mobile applications. Indeed, empowering tourists with mobile access to services such as hotel reservations, airline ticketing, and recommendations for local attractions generates strong interest and considerable profits.

- ① Useful Mobile Applications for Traveling
- ② New Travel Technology That Keeps You Safe
- ③ Why Mobile Access is Key to Hotel Brand Loyalty
- ④ The Importance of Customer Experience in Tech Industry
- ⑤ How the Evolution of ICTs Has Changed the Tourism

4. 다음 글의 내용과 일치하지 않는 것은? ⁴⁾ [12
강 18번]

Sensory nerves have specialized endings in the tissues that pick up a particular sensation. If, for example, you step on a sharp object such as a pin, nerve endings in the skin will transmit the pain sensation up your leg, up and along the spinal cord to the brain. While the pain itself is unpleasant, it is in fact acting as a protective mechanism for the foot. Within the brain, nerves will connect to the area that controls speech, so that you may well shout 'ouch' or something rather less polite. They will also connect to motor nerves that travel back down the spinal cord, and to the muscles in your leg that now contract quickly to lift your foot away from the painful object. Sensory and motor nerves control almost all functions in the body — from the beating of the heart to the movement of the gut, sweating and just about everything else.

- ① Different sensations are detected by motor nerves instead of sensory nerves.
- ② Pain, although unpleasant, functions as a protective mechanism for the body.
- ③ The brain connects the pain signal to areas that control speech.
- ④ Motor nerves carry signals from the brain back to the muscles.
- ⑤ Sensory and motor nerves control vital functions such as heartbeat, digestion, and sweating.

5. 다음 글의 내용과 일치하지 않는 것은? ⁵⁾ [12강 19번]

Today, the water crisis is political - which is to say, not inevitable or beyond our capacity to fix - and, therefore, functionally elective. That is one reason it is nevertheless distressing: an abundant resource made scarce through governmental neglect and indifference, bad infrastructure and contamination, and careless urbanization. There is no need for a water crisis, in other words, but we have one anyway, and aren't doing much to address it. Some cities lose more water to leaks than they deliver to homes: even in the United States, leaks and theft account for an estimated loss of 16 percent of freshwater; in Brazil, the estimate is 40 percent. Seen in both cases, as everywhere, the selective scarcity clearly highlights have-and-have-not inequities, leaving 2.1 billion people without safe drinking water and 4.5 billion without proper sanitation worldwide.

- ① The current water crisis is political and thus not an unavoidable fate.
- ② A scarce resource like water has been turned into a sufficient commodity due to factors like government's lack of concern.
- ③ A water crisis is unnecessary, yet it persists, and little action is being taken to resolve it.
- ④ In certain urban areas, more water is wasted through leaks than is supplied to residents.
- ⑤ Losses from leaks and theft are estimated at 16 percent of freshwater in the U.S.

6. 아래 글에서 알 수 있는 사실로 가장 적절한 것은? ⁶⁾ [12강 20번]

What does it mean for a character to be a hero as opposed to a villain? In artistic and entertainment descriptions, it's essential for the author to establish a positive relationship between a protagonist and the audience. In order for tragedy or misfortune to draw out an emotional response in viewers, the character must be adjusted so as to be recognizable as either friend or enemy. Whether the portrayal is fictional or documentary, we must feel that the protagonist is someone whose actions benefit us; the protagonist is, or would be, a worthy companion or valued ally. Violent action films are often filled with dozens of incidental deaths of minor characters that draw out little response in the audience. The audience seldom feels strong emotions toward characters who are not clearly portrayed as allies or enemies.

- ① Viewers only care about tragic ending
- ② Secondary characters contribute to the story's depth.
- ③ Emotional response depends on the audience's connection to the character.
- ④ Documentary characters can confuse the line between hero and villain.
- ⑤ The audience should view the protagonist from an objective perspective.

7. 다음 글의 밑줄 친 부분 중, 어법상 어색한 것은? ⁷⁾ [12강 21번]

In the 1930s, the British psychologist Sir Frederic Bartlett asked people to listen to folktales from other countries and then ①to recall these stories at a later date. As you might guess, unfamiliar stories were remembered significantly worse than ②those with which participants were already familiar. ③Being requested to retell the stories, participants made various errors - they omitted details, changed the order of events, and struggled to recall parts that felt foreign or unfamiliar to them. Surprisingly, however, these errors in memory ④were not random. Rather, subjects often rewrote similar parts of the stories in their own minds - particularly the parts that made the least sense to them. For example, they replaced unusual cultural elements like "canoes" with "boats" and rationalized mystical events to fit a more logical, familiar framework. Bartlett concluded that when humans face problems, we draw upon mental schemata, or shelves of stored knowledge in our brains, to fill in any minor gaps in our memories. Therefore, remembering is an imaginative process ⑤e which previous experiences serve as a foundation for reconstructing the past.

- ① a ② b ③ c ④ d ⑤ e

8. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은? ⁸⁾ [12강 22번]

Humans for centuries have dreamed of machines that could become intelligent and make ①humanlike decisions. There have been myths about robots, automatons, and artificial beings since ancient Greece (e.g., the myth of Pandora, who released ills upon the world). Likewise, literature throughout history has dreamed of creating humanlike ②creators and thinking machines (e.g., Mary Shelley's *Frankenstein*). In 1950, British mathematician Alan Turing asked whether machines could think and ③reason like humans and then developed the Turing test to measure a machine's intelligence and whether the machines can think ④autonomously. A few years later, MIT professor John McCarthy coined "artificial intelligence," replacing the previously used expression "automata studies." Since then, artificial intelligence has become the study and practice of "making intelligent machines" that are programmed to think like humans - ⑤endowed by their creators with reasoning and learning.

- ① a ② b ③ c ④ d ⑤ e

9. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은? 9) [11강 46번]

We have to recognize that there always exists in us the strongest need to utilize all our attention.

(A) If we are playing a chess game with a weaker opponent, we will seek to supplement this activity with another: such as watching TV, or listening to music, or playing another chess game at the same time.

(B) Like this, we move in unconscious ways, such as playing with something in one's hands or pacing around the room; and if such an action also serves to increase pleasure or relieve displeasure, all the better.

(C) This can be proved by our displeasure when we feel the entirety of our capacity for attention is not being put to use. When this is the case, we will seek to find outlets for our unused attention.

- ① (A) - (C) - (B) ② (B) - (A) - (C)
③ (B) - (C) - (A) ④ (C) - (A) - (B)
⑤ (C) - (B) - (A)

10. 다음 글의 제목으로 가장 적절한 것은? 10) [12강 01번]

A group of psychologists studied individuals with severe mental illness who experienced weekly group music therapy, including singing familiar songs and composing original songs. The results showed that the group music therapy improved the quality of participants' life, with those participating in a greater number of sessions experiencing the greatest benefits. Focusing on singing, another group of psychologists reviewed articles on the efficacy of group singing as a mental health treatment for individuals living with a mental health condition in a community setting. The findings showed that, when people with mental health conditions participated in a choir, their mental health and wellbeing significantly improved. Group singing provided enjoyment, improved emotional states, developed a sense of belonging and enhanced self-confidence.

- ① The Therapeutic Effects of Group Music on Mental Health Conditions
② The Importance of Professional Therapy Over Self-Treatment
③ The Benefits of Listening to Music Alone for Mental Health
④ Why Group Music Therapy Fails to Deliver Real Benefits
⑤ Music Therapy: Its Historical Development in Healthcare

11. 다음 빈칸에 들어갈 말로 가장 적절한 것은? ¹¹⁾ [12강 02번]

Why do we have the illusion that cramming for an exam is the best learning strategy? It is because we are unable to differentiate between the various sections of our memory. Immediately after reading our textbook or our class notes, information is fully present in our mind. It sits in our conscious' working memory, in an active form. We feel as if we know it, because it is present in our short-term storage space ... but this short-term section has nothing to do with the long-term memory that we will need in order to recall the same information a few days later. After a few seconds or minutes, working memory already starts disappearing, and after a few days, the effect becomes enormous: unless you retest your knowledge, memory vanishes. To get information into long-term memory, it is essential to study the material, then test yourself, rather than spend all your time studying. This means that true mastery requires us to step away from the false comfort of temporary familiarity. To prevent what we learned from vanishing, we must actively _____.

- ① buy pre-made study guides created by others
- ② read the class notes right before the exam begins
- ③ practice retrieving information to transfer it into long-term memory
- ④ create a comfortable environment to lower our exam anxiety
- ⑤ cram as much information as possible into our short-term storage

12. 다음 빈칸에 들어갈 말로 가장 적절한 것은? ¹²⁾ [12강 03번]

The Zeigarnik effect is commonly referred to as the tendency of the subconscious mind to remind you of a task that is incomplete until that task is complete. Bluma Zeigarnik was a Lithuanian psychologist who wrote in the 1920s about the effects of leaving tasks incomplete. She noticed the effect while watching waiters serve in a restaurant. The waiters would remember an order, however complicated, until the order was complete, but they would later find it difficult to remember the order. Zeigarnik did further studies giving both adults and children puzzles to complete then interrupting them during some of the tasks. The results showed that both adults and children _____ because of the interruptions better than the ones that had been fulfilled.

- ① were uninterested in taking the order
- ② didn't remember to take the order
- ③ forgot making tasks incomplete
- ④ remembered the tasks that had been complicated
- ⑤ remembered the tasks that hadn't been completed

13. 다음 글의 밑줄 친 부분 중 어법상 어색한 것은? ¹³⁾ [12강 04번]

According to Marguerite La Caze, fashion contributes to our lives and @provides a medium for us to develop and exhibit important social virtues. Fashion may be beautiful, innovative, and useful; we can be @creative and show good taste in our fashion choices. @Dressed with taste and care, we represent both self-respect and a concern for the pleasure of others. There is no doubt that fashion can be a source of interest and pleasure @what links us to each other. That is, fashion provides a sociable aspect along with opportunities for imagining oneself differently - @trying on different identities.

- ① a ② b ③ c ④ d
⑤ e

14. 다음 빈칸에 들어갈 말로 가장 적절한 것은? ¹⁴⁾ [12강 06]

In statistics, the law of large numbers describes a situation where _____. According to it, the more often an experiment is conducted, the closer the average of the results can be expected to match the true state of the world. For instance, on your first encounter with the game of roulette, you may have beginner's luck after betting on 7. But the more often you repeat this bet, the closer the relative frequency of wins and losses is expected to approach the true chance of winning, meaning that your luck will at some point fade away. Similarly, car insurers collect large amounts of data to figure out the chances that drivers will cause accidents, depending on their age, region, or car brand. Both casinos and insurance industries rely on the law of large numbers to balance individual losses.

- ① repeated experiments allow researchers to make subjective judgments when data is insufficient
② making accurate predictions requires relying on intuition rather than evidence
③ the accumulation of data improves the reliability of predictions
④ using more data can lead to faster insights than working with limited information
⑤ having a limited amount of data often increases the reliability of the results

15. 다음 글의 밑줄 친 ㉠~㉣중 어법상 옳은 것의 개수는? 15) [12강 08번]

The Barnum Effect is the phenomenon ㉠in which someone reads or hears something very general but believes that it applies to them. In fact, however, these statements are true for many. Human psychology enables us ㉢to want to believe things that we can identify with on a personal level and even seek information where it doesn't necessarily exist, filling in the blanks with our imagination for the rest. This is the principle that horoscopes rely on, offering data that seems to be ㉡personally but probably makes sense to countless people. Because the people ㉣reading them want to believe the information so badly, they will search for meaning in their lives that make ㉠it true.

- ① 1개 ② 2개 ③ 3개 ④ 4개 ⑤ 5개

16. 다음 글의 빈칸에 들어갈 말로 가장 적절한 것은? 16) [12강 09번]

Internet activist Eli Pariser noticed how online search algorithms encourage our human tendency to grab hold of everything that confirms the beliefs we already hold, while quietly ignoring information that doesn't match those beliefs. We set up a so-called "filter-bubble" around ourselves, where we are constantly exposed only to that material that we agree with. We are never challenged, never giving ourselves the opportunity to _____. In the best case, we become naive and sheltered, and in the worst, we become radicalized with extreme views, unable to imagine life outside our particular bubble. The results are disastrous: intellectual isolation and the real distortion that comes with believing that the little world we create for ourselves is the world.

- ① build an intellectual system
- ② get some benefits from the material
- ③ make our own world view distinctive
- ④ be supported by those who have the same belief
- ⑤ recognize the fact that diversity and difference are present
