이름:

1. 다음 글의 요지로 가장 적절한 것은?¹⁾ [11강 41번]

The best way in which innovation changes our lives is by enabling people to work for each other. The main theme of human history is that we become steadily more specialized in what we produce, and steadily more diversified in what we consume: we move away from unstable self-sufficiency to safe mutual interdependence. By concentrating on serving other people's needs for forty hours a week — which we call a job — you can spend the other seventy-two hours (not counting fifty-six hours in bed) relying on the services provided to you by other people. Innovation has made it possible to work for a fraction of a second in order to be able to afford to turn on an electric lamp for an hour, providing the quantity of light that would have required a whole day's work if you had to make it yourself by collecting and refining sesame oil or lamb fat to burn in a simple lamp, as much of humanity did in the not so distant past.

*a fraction of a second: 아주 짧은 시간

**refine: 정제하다

- ① 노동 효율성은 혁신의 발전으로 과거보다 크게 향상되었다.
- ② 자급자족 경제보다 분업을 통한 협력 경제가 더 안정적이다.
- ③ 노동 시간의 감소는 개인이 더 많은 여가 활동을 즐길 수 있게 한다.
- ④ 직업을 통해 다른 사람의 필요를 충족시키는 것이 현대사회의 특징이다.
- ⑤ 혁신은 생산의 전문화와 다양화를 통해 상호 의존 사회를 가능하게 한다.

2. 다음 글의 주제로 가장 적절한 것은?²⁾ [11강 42번]

Generalization without specific examples that humanize writing is boring to the listener and to the reader. Who wants to read platitudes all day? Who wants to hear the words great, greater, best, smartest, finest, humanitarian, on and on and on without specific examples? Instead of using these 'nothing words,' leave them out completely and just describe the particulars. There is nothing worse than reading a scene in a novel in which a main character is described up front as heroic or brave or tragic or funny, while thereafter, the writer quickly moves on to something else. That's no good, no good at all. You have to use less one word descriptions and more detailed, engaging descriptions if you want to make something real.

*platitude: 상투적인 말

- ① benefit of employing platitude in writing
- ② utilization of simplified language for readers
- ③ negative impact of concise examples writing
- ④ advantage of analyzing emotional themes in literature
- ⑤ importance of using specific descriptions for engaging writing

3. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?³⁾ [11강 43번]

The famous primatologist Frans de Waal, of Emory University, says humans downplay similarities between us and other animals as a way of maintaining our spot at the top of our imaginary ladder. Scientists, de Waal points out, can be some of the worst offenders — employing technical language to distance the other animals from us. They call "kissing" in chimps "mouth-to-mouth contact"; they call "friends" between primates "favorite affiliation partners"; they interpret evidence showing that crows and chimps can make tools as being somehow qualitatively different from the kind of toolmaking said to define humanity. If an animal can beat us at a cognitive task — like how certain bird species can remember the precise locations of thousands of seeds — they write it off as instinct, not intelligence. This and so many more tricks of language are what de Waal has termed "linguistic castration." The way we use our tongues to disempower animals, the way we invent words to maintain our spot at the top.

* primatologist: 영장류학자 ** affiliation: 제휴

↓

Humans often use language to (A)_____ the similarities between themselves and other animals in order to maintain a sense of human (B)_____.

(A)

(B)

- | | |
|--------------|-------------|
| ① undermine | superiority |
| ② strengthen | dignity |
| ③ downplay | morality |
| ④ underline | dominance |
| ⑤ weaken | frustration |

4. 다음 "Brainwriting"에 관한 글을 읽고 추론할 수 있는 것은?⁴⁾ [11강 44번]

To find the hidden potential in teams, instead of brainstorming, we're better off shifting to a process called brainwriting. The initial steps are solo. You start by asking everyone to generate ideas separately. Next, you pool them and share them anonymously among the group. To preserve independent judgment, each member evaluates them on their own. Only then does the team come together to select and refine the most promising options. By developing and assessing ideas individually before choosing and elaborating them, teams can surface and advance possibilities that might not get attention otherwise. This brainwriting process makes sure that all ideas are brought to the table and all voices are brought into the conversation. It is especially effective in groups that struggle to achieve collective intelligence.

- ① It is more stressful for team members.
- ② It increases the need for team meetings.
- ③ It is a faster process than brainstorming.
- ④ It forbids team members from generating more creative ideas.
- ⑤ It sees to it that all ideas are brought to the table and considered.

5. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.⁵⁾
 [11강 45번]

What do advertising and map-making have in common? Without doubt the best answer is their shared need to communicate a limited version of the truth. An advertisement must create an image that's appealing and a map must present an image that's clear, but neither can meet its goal by _____. Ads will cover up or play down negative aspects of the company or service they advertise. In this way, they can promote a favorable comparison with similar products or differentiate a product from its competitors. Likewise, the map must remove details that would be confusing.

- ① reducing its exposure to people
- ② showing or telling every detail
- ③ listening to people's opinions
- ④ differentiating its products
- ⑤ criticizing its competitors

6. 다음 글의 괄호 (A), (B), (C) 안에서 문맥에 맞는 낱말로 가장 적절한 것은?⁶⁾ [11강 46번]

We have to recognize that there always exists in us the strongest need to utilize all our attention. And this is quite (A)[ambiguous / evident] in the great amount of displeasure we feel any time the entirety of our capacity for attention is not being put to use. When this is the case, we will seek to find outlets for our unused attention. If we are playing a chess game with a weaker opponent, we will seek to (B)[supplement / compliment] this activity with another: such as watching TV, or listening to music, or playing another chess game at the same time. Very often this reveals itself in (C)[unconscious / conscious] movements, such as playing with something in one's hands or pacing around the room; and if such an action also serves to increase pleasure or relieve displeasure, all the better.

(A) (B) (C)

- | | | |
|-------------|------------|-------------|
| ① ambiguous | compliment | unconscious |
| ② evident | supplement | unconscious |
| ③ ambiguous | compliment | conscious |
| ④ evident | compliment | conscious |
| ⑤ ambiguous | supplement | unconscious |

7. 다음 빈칸에 들어갈 말로 가장 적절한 것은?⁷⁾ [11강 47번]

When reading another scientist's findings, think critically about the experiment. Ask yourself: Were observations recorded during or after the experiment? Do the conclusions make sense? Can the results be repeated? Are the sources of information reliable? You should also ask if the scientist or group conducting the experiment was unbiased. Being unbiased means that _____. For example, if a drug company pays for an experiment to test how well one of its new products works, there is a special interest involved: The drug company profits if the experiment shows that its product is effective. Therefore, the experimenters aren't objective. They might ensure the conclusion is positive and benefits the drug company. When assessing results, think about any biases that may be present!

- ① the scientist conducting the experiment supports one particular drug company.
- ② no one gets any special benefit from the outcome of the experiment
- ③ the experiment is carried out repeatedly to keep the results reliable
- ④ the experiment is designed under the same sets of condition
- ⑤ the conclusion is based on the scientific evidence

8. 다음 글의 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것은?⁸⁾ [11강 48번]

Recently I was with a client who had spent almost five hours with me. As we were parting for the evening, we @reflected on what we had covered that day. Even though our conversation was very collegial, I noticed that my client was holding one leg at a right angle to his body, seemingly wanting to @take off on its own. At that point I said, "You really do have to leave now, don't you?" "Yes," he @admitted. "I am so sorry. I didn't want to be rude but I have to call London and I only have five minutes!" Here was a case where my client's language and most of his body @revealed nothing but positive feelings. His feet, however, were the most honest communicators, and they clearly told me that as much as he wanted to @leave, duty was calling.

*collegial: 평등하게 책임을 지는

- ① Ⓐ ② Ⓑ ③ Ⓒ ④ Ⓓ ⑤ Ⓔ

9. 다음 글의 빈칸에 들어갈 말로 가장 적절한 것은?⁹⁾ [11강 49번]

One big difference between science and stage magic is that while magicians hide their mistakes from the audience, in science you make your mistakes in public. You show them off so that _____. This way, you get the advantage of everybody else's experience, and not just your own idiosyncratic path through the space of mistakes. This, by the way, is another reason why we humans are so much smarter than every other species. It is not that our brains are bigger or more powerful, or even that we have the ability to reflect on our own past

errors, but that we that our individual brains have earned from their individual histories of trial and error.

* idiosyncratic: (개인에게) 특유한

- ① you take your mistakes more seriously
- ② you can compare your life with others'
- ③ people can overestimates their own lives
- ④ everybody can learn from others' mistakes
- ⑤ everybody understand the concept of individualism

10. 다음 글의 주제로 가장 적절한 것은?¹⁰⁾ [11강 50번]

For many people, ability refers to intellectual competence, so they want everything they do to reflect how smart they are — writing a brilliant legal brief, getting the highest grade on a test, writing elegant computer code, saying something exceptionally wise or witty in a conversation. You could also define ability in terms of a particular skill or talent, such as how well one plays the piano, learns a language, or serves a tennis ball. Some people focus on their ability to be attractive, entertaining, up on the latest trends, or to have the newest gadgets. However ability may be defined, a problem occurs when it is the sole determinant of one's self-worth. The performance becomes the only measure of the person; nothing else is taken into account. An outstanding performance means an outstanding person; an average performance means an average person. Period.

- ① risks of linking ability to self-worth
- ② merits and demerits of inborn talent
- ③ requirements related to performance
- ④ negative factors of performance test
- ⑤ diverse views of identity

11. 다음 social media celebrities에 관한 글의 내용과 일치하지 않는 것은?¹¹⁾ [11강 51번]

While social media attention is potentially an instrument to achieve ends like elite celebrity, some content creators desire ordinary fame as a social end in itself. Not unlike reality television stars, social media celebrities are often criticized for not having skills and talents associated with traditional, elite celebrity, such as acting or singing ability. This criticism highlights the fact that digital content creators face real barriers to crossing over to the sphere of elite celebrity. However, the criticism also misses the point that the phenomenon of ordinary celebrity reconstructs the meaning of fame. The elite celebrity is symbolized by the metaphor of the star, characterized by mystery and hierarchical distance and associated with naturalized qualities of talent and class. The ordinary celebrity attracts attention through regular and frequent interactions with other ordinary people. Achieving ordinary fame as a social media celebrity is like doing well at a game, because in this sphere, fame is nothing more nor less than relatively high scores on attention scales, the metrics of subscribers, followers, Likes, or clicks built into social media applications.

*sphere: 영역 **metric: 측정 기준

- ① 연기나 가창력 비판을 종종 받는다.
- ② 엘리트 명성의 영역으로 가는데 장벽이 있다.
- ③ 스타라는 은유로 상징되고 계층적 거리로 특징지어진다.
- ④ 평범한 사람들과의 상호작용을 통해 관심을 끈다.
- ⑤ 명성은 소셜 미디어 애플리케이션에 내장된 점수가 높다는 뜻일 뿐이다.

12. 다음 글에 대한 내용으로 일치하는 것은?¹²⁾ [11강 52번]

Interestingly, in nature, the more powerful species have a narrower field of vision. The distinction between predator and prey offers a clarifying example of this. The key feature that distinguishes predator species from prey species isn't the presence of claws or any other feature related to biological weaponry. The key feature is the position of their eyes. Predators evolved with eyes facing forward which allows for binocular vision that offers accurate depth perception when pursuing prey. Prey, on the other hand, often have eyes facing outward, maximizing peripheral vision, which allows the hunted to detect danger that may be approaching from any angle. Consistent with our place at the top of the food chain, humans have eyes that face forward. We have the ability to gauge depth and pursue our goals, but we can also miss important action on our periphery.

- ① The distinction between predator and prey depends on their eyesight.
- ② Biological weaponry is the most important factor pursuing preys.
- ③ Strong species' eyes facing forward enable them to realize danger.
- ④ Eyes facing outward not only help preys hunt foods and but also help them detect danger.
- ⑤ Humans are good at perceiving depth but are poor at noticing peripheral events.

13. 다음 글에서 필자가 주장하는 바로 가장 적절한 것은?¹³⁾ [11강 53번]

Since a great deal of day-to-day academic work is boring and repetitive, you need to be well motivated to keep doing it. A mathematician sharpens her pencils, works on a proof, tries a few approaches, gets nowhere, and finishes for the day. A writer sits down at his desk, produces a few hundred works, decides they are no good, throws them in the bin, and hopes for better inspiration tomorrow. To produce something worthwhile—if it ever happens—may require years of such fruitless labor. The Nobel Prizewinning biologist Peter Medawar said that about four-fifths of his time in science was wasted, adding sadly that "nearly all scientific research leads nowhere." What kept all of these people going when things were going badly was their passion for their subject. Without such passion, they would have achieved nothing.

*proof: (수학) 증명

- ① 의욕만 넘쳐서는 성공할 수 없다.
- ② 꾸준히 반복하면 언젠가는 능숙해진다.
- ③ 성과를 내지 못하는 과정은 가치가 없다.
- ④ 과학적 연구는 늘 유용한 결과를 창출해낸다.
- ⑤ 가치 있는 결과를 위해서는 결실 없는 시간도 필요하다.

14. 다음 빈칸에 들어갈 말로 가장 적절한 것은?¹⁴⁾ [11강 54번]

People engage in typical patterns of interaction under the influence of _____. Employers are expected to interact with employees in a certain way, as are doctors with patients. In each case, actions are restricted by the role responsibilities and obligations associated with individuals' positions within society. For instance, parents and children are linked by certain rights, privileges, and obligations. Parents are responsible for providing their children with the basic necessities of life – food, clothing, shelter, and so forth. These expectations are so powerful that not meeting them may make the parents vulnerable to charges of negligence or abuse. Children, in turn, are expected to do as their parents say. Thus, interactions within a relationship are functions not only of the individual personalities of the people involved but also of the role requirements associated with the statuses they have.

- ① employment status
- ② universal rules and laws
- ③ power of role expectations
- ④ their own individual responsibility
- ⑤ economic and educational background

15. 다음 글의 빈칸 (A)에 들어갈 말로 가장 적절한 것은?¹⁵⁾ [11강 55번]

The title of Thomas Friedman's 2005 book, *The World Is Flat*, was based on the belief that globalization would inevitably bring us closer together. It has done that, but it has also inspired us to build barriers. When faced with perceived threats – the financial crisis, terrorism, violent conflict, refugees and immigration, the increasing gap between rich and poor – people cling more tightly to their groups. One founder of a famous social media company believed social media would unite us. In some respects it has, but it has simultaneously given voice and organizational ability to new cyber tribes, some of whom spend their time spreading blame and division across the World Wide Web. (A) _____

_. Is it possible for these tribes to coexist in a world where the concept of “us and them” remains?

- ① The World Wide Web gives users access to lots of documents that are interrelated to each other by means of hypertext, so it is helpful for spreading globalization.
- ② There seem now to be as many tribes, and as much conflict between them, as there have ever been.
- ③ There has been a growing controversy and blame over some years against the addictiveness of social media.
- ④ The goal of globalization is to flourish individual economies around the world by making competition among people increase and limiting national conflicts.
- ⑤ Globalization and democracy can exist together although sometimes they seem to often dislike each other.

16. 다음 글의 밑줄 친 말을 문맥에 맞게 바꿀 때 옳지 않은 것은?¹⁶⁾ [11강 56번]

Focusing on the differences among societies @reveals a deeper reality: their similarities are greater and more @uncomplicated than their dissimilarities. Imagine studying two hills while standing on a ten-thousand-foot-high plateau. @Seeing from your perspective, one hill appears to be three hundred feet high, and the other appears to be nine hundred feet. This difference may seem large, and you might focus your attention on what local forces, such as erosion, account for the difference in size. But this @unrestricted perspective misses the opportunity to study the other, more significant geological forces that created what are actually two very similar mountains, one 10,300 feet high and the other 10,900 feet. And when it comes to human societies, people have been standing on a ten-thousand-foot plateau, letting the differences among societies @unmask the more overwhelming similarities.

- ① @reveals → conceals
- ② @uncomplicated → profound
- ③ @Seeing → Seen
- ④ @unrestricted → narrow
- ⑤ @unmask → expose

17. 다음 글의 제목으로 가장 적절한 것은?¹⁷⁾ [11강 57번]

Back in 1996, an American airline was faced with an interesting problem. At a time when most other airlines were losing money or going under, over 100 cities were begging the company to service their locations. However, that's not the interesting part. What's interesting is that the company turned down over 95 percent of those offers and began serving only four new locations. It turned down tremendous growth because company leadership had set an upper limit for growth. Sure, its executives wanted to grow each year, but they didn't want to grow too much. Unlike other famous companies, they wanted to set their own pace, one that could be sustained in the long term. By doing this, they established a safety margin for growth that helped them continue to thrive at a time when the other airlines were flailing.

*flail: 마구 흔들리다

- ① How to Expand Airline Company.
- ② How to Turn Down the Attractive Offer.
- ③ Importance of Adding New Serving Locations.
- ④ Disadvantages of Tremendous Growth.
- ⑤ Importance of Establishing a Safety Margin for Growth.

18. 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?¹⁸⁾ [11강 58번]

It is important to distinguish between being legally allowed to do something, and actually being able to go and do it. A law could be passed allowing everyone, if they so wish, to run a mile in two minutes. That would not, however, increase their effective freedom, because, although allowed to do so, they are physically incapable of it. Having a minimum of restrictions and a maximum of possibilities is fine. But in the real world most people will never have the opportunity either to become all that they are allowed to become, or to need to be restrained from doing everything that is possible for them to do.

The effective freedom depends on whether you have the (A)_____ to do what you are (B)_____ to do.

- | (A) | (B) |
|-----------------------|------------|
| ① physical ability | allowed |
| ② physical disability | allowed |
| ③ legal system | restrained |
| ④ physical ability | restrained |
| ⑤ mental ability | restrained |

19. 다음 글의 빈칸에 들어갈 말로 가장 적절한 것은?¹⁹⁾ [11
강 59번]

You hear again and again that some of the greatest composers were misunderstood in their own day. Not everyone could understand the compositions of Beethoven, Brahms, or Stravinsky in their day. The reason for this initial lack of acceptance is _____. The musical forms, or ideas expressed within them, were completely new. And yet, this is exactly one of the things that makes them so great. Effective composers have their own ideas. Have you ever seen the classic movie Amadeus? The composer Antonio Salieri is the "host" of this movie; he's depicted as one of the most famous Nongreat composers — he lived at the time of Mozart and was completely overshadowed by him. Now, Salieri wasn't a bad composer; in fact, he was a very good one. But he wasn't one of the world's great composers because his work wasn't original. What he wrote sounded just like what everyone else was composing at the time.

- ① intimacy ② simplicity
- ③ familiarity ④ inexperience
- ⑤ understandability

20. 다음 글의 주제로 가장 적절한 것은?²⁰⁾ [11강 60번]

The best defence most species of octopus have is to stay hidden as much as possible and do their own hunting at night. So to find one in full view in the shallows in daylight was a surprise for two Australian underwater photographers. Actually, what they saw at first was a flounder. It was only when they looked again that they saw a medium-sized octopus, with all eight of its arms folded and its two eyes staring upwards to create the illusion. An octopus has a big brain, excellent eyesight and the ability to change colour and pattern, and this one was using these assets to turn itself into a completely different creature. Many more of this species have been found since then, and there are now photographs of octopuses that could be said to be transforming into sea snakes. And while they mimic, they hunt — producing the spectacle of, say, a flounder suddenly developing an octopodian arm, sticking it down a hole and grabbing whatever's hiding there.

- ① various species of octopuses
- ② where octopuses live in the sea
- ③ when octopuses hide themselves and appear
- ④ the relationship between octopuses and humans
- ⑤ the ability of octopuses to disguise for survival

- 1) ⑤
- 2) ⑤
- 3) ①
- 4) ⑤
- 5) ②
- 6) ②
